Render Summary Webpage Prompt

Objective

Create a clean, professional, single-page Markdown report for Smart Content Summarizer (SummaSmart). Display the user's instructions, original source URL, generated summary, and original retrieved webpage content.

User Input / Context

User Instructions:
{{"type": "in", "path": "ask_user_user_instructions", "title": "User Instructions"}}

Source URL:
{{"type": "in", "path": "ask_user_source_url", "title": "Get Content Source"}}

Original Web Content:
{{"type": "in", "path": "node_step_retrieved_article", "title": "Fetch content"}}

Generated Summary:
{{"type": "in", "path": "node_step_generated_summary", "title": "Summarize Content"}}

Output Format

Smart Content Summarizer

User Instructions

Display the user's original summarization instructions.

Source Article

Display the source URL as a clickable Markdown link.

Executive Summary

Display the generated summary exactly as returned by the summary step. Preserve its headings and bullet points.

Original Web Content

Display the retrieved article text. Preserve its main headings and paragraphs where possible.

Design Rules

- Use readable Markdown headings, bold text, lists, and links.
- Prioritize the summary over the original article.
- Keep the page professional, clear, and easy to scan.
- Do not use raw HTML or invent content.
- If an input is missing, state that it is unavailable.

Note: Interactive accordions, floating buttons, CSS styling, and transitions depend on platform support and are not guaranteed by Markdown alone.
